PROBLEM STATEMENT:

- Analyze system log data using Python.
- Identify different log levels: INFO, ERROR, WARNING.
- Count occurrences of each type.
- Display meaningful summary output.

CODE:

```
file = open("CS4.txt", "r")  
  
info = 0  
error = 0  
warning = 0  
  
for line in file:  
    if "INFO" in line:  
        info += 1  
    elif "ERROR" in line:  
        error += 1  
    elif "WARNING" in line:  
        warning += 1  
  
print("INFO count:", info)  
print("ERROR count:", error)  
print("WARNING count:", warning)  
  
file.close()
```

OUTPUT:

```
INFO count: 5  
ERROR count: 3  
WARNING count: 2
```
